Work experience

Implementation Analyst | Speedpro Consultoria, assigned to Trio Engenharia + Arquitetura

Jun 2025 – Present

- Technical support and incident diagnosis for Windows, Microsoft 365, remote access, networks and business software.
- Automation and standardization of administrative routines with PowerShell, technical documentation and reusable procedures.
- Analysis of logs and recurring failures: Windows events, authentication, corporate email and software integrations.
- Inventory of equipment, licenses and IT assets, with an Excel control base and detection of underused tools.

Performance Analyst | Aloha011 – Fashion Retail

Apr 2024 – Feb 2025

- Tracking of metrics in Google Sheets, analysis of deviations and reports to support sales decisions.
- Mapping of failures in the customer relationship flow and an improvement proposal adopted by the team.

Featured projects

Kepler Lab | React, Vite, Three.js, TypeScript

3D web experience to explore the Milky Way, with 22 astronomical destinations and curated scientific content.

<https://github.com/Migliatti/kepler-lab>

LabReserve | TypeScript, React, SQLite

Web system to check availability and book labs and equipment, with automated tests.

<https://github.com/Migliatti/labreserve>

Grimoire | Python, Markdown, Claude Code, Codex

Open source catalog of reusable skills and workflows for AI agents, installable in Claude Code and Codex.

<https://github.com/Migliatti/grimoire>
